

WEB DESIGN ASSIGNMENT

1. Design the hierarchy of your website – example below.

2. Design the general layout of your website – how each page within the site will be laid out. Consistent look and layout between pages is considered good design. An example is below:

3. List the type of color scheme you will use (monochromatic, analogous, etc.)

4. List the colors (name and hex RGB value) you will use for each of the following:

- background color
- text color
- main color in the banner and other key images
- navigation color
- links color
