

The Greenbush Project is Design-Build at the MBTA

Public projects are successfully exploring the world of design-build as the alternative project delivery system to conventional design-bid-build and construction management. The MBTA's first design-build project is the Greenbush rail line on the south shore. Through the careful leadership of Mark Pelletier, P.E., the project progressed so far, with admirable effort.

Special Program – March 18 – DBIA with WTS

Thursday, March 18 at the Tremont House, Boston will be the first joint program with DBIA and WTS. Combining the strengths of both organizations, the program features progress and challenges of design-build in public transportation. DBIA is committed to combining efforts with other professional organizations to foster awareness of the broad applications and wide interest-areas of design-build.
