

System Dynamics As A Problem Solving Methodology Used Across Different Disciplines

A Lecture Given By System Dynamics Founder Jay Forrester

The WPI System Dynamics Club and the SSPS Department are proud to welcome Professor Jay Forrester to campus to discuss the use of System Dynamics as a problem solving methodology across disciplines. Professor Forrester is the founder of System Dynamics, inventor of random-access memory, and created some of the earliest computer system. He is known for his counter-intuitive systems-derived policy recommendations in a number of global and national contexts.

Professor Forrester is currently the Germashausen Professor Emeritus and a Senior Lecturer at MIT. He also serves on WPI's System Dynamics Advisory Board.

This is a unique opportunity for members of the WPI Community to welcome and interact with one of the greatest thinkers of our time. Everyone is welcome to come!

Following the lecture there will be a Q & A session and refreshments.

Where? Salisbury Labs Room 105
When? Wednesday, April 26, 5:30 p.m.
Who? Everyone
