

Helping Hand

Justin Che, Amith Chintalapati, Charlotte Cain

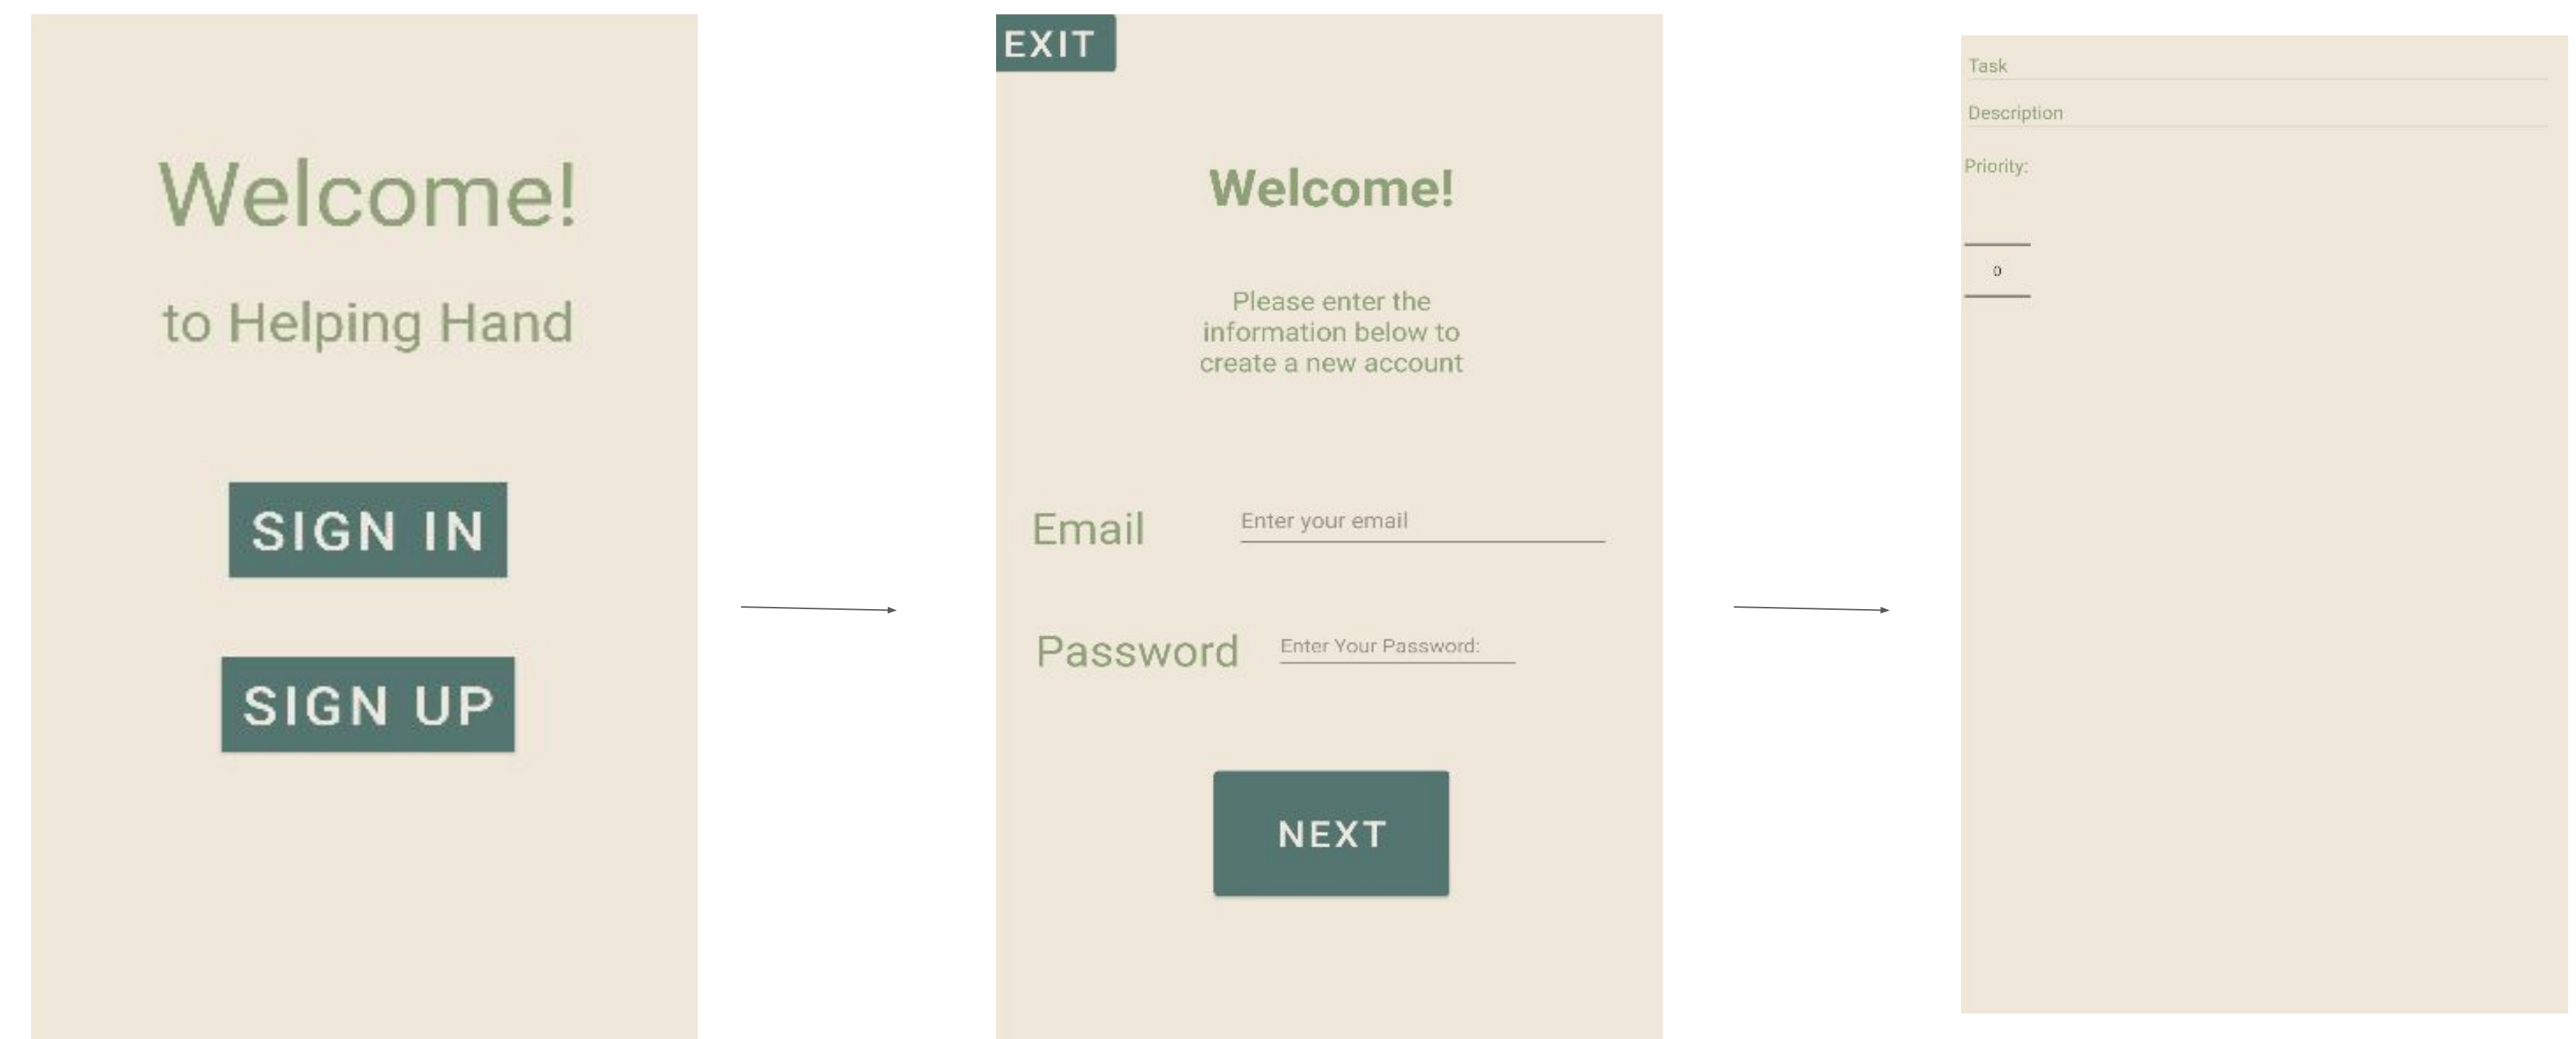

Motivation:

The motivation for our app came from wanting to help people in need. We saw that many people oftentimes don't have the time or ability to complete extra tasks, such as raking leaves or shoveling snow. With this app, we hope to provide people a way to easily reach out to their community to help with these tasks.

Potential Users & Target Audience:

Our target audience for this project is refugees. This app would allow them to not only ask for help with the tasks they don't have time for, it would also allow them to get acquainted with their community.

Once logged into our app, users are able to either post a task they need help with or search around the posted tasks to see if they can help. Each task made will include a problem description as well as priority level. Once added, other users will be able to see the problems.

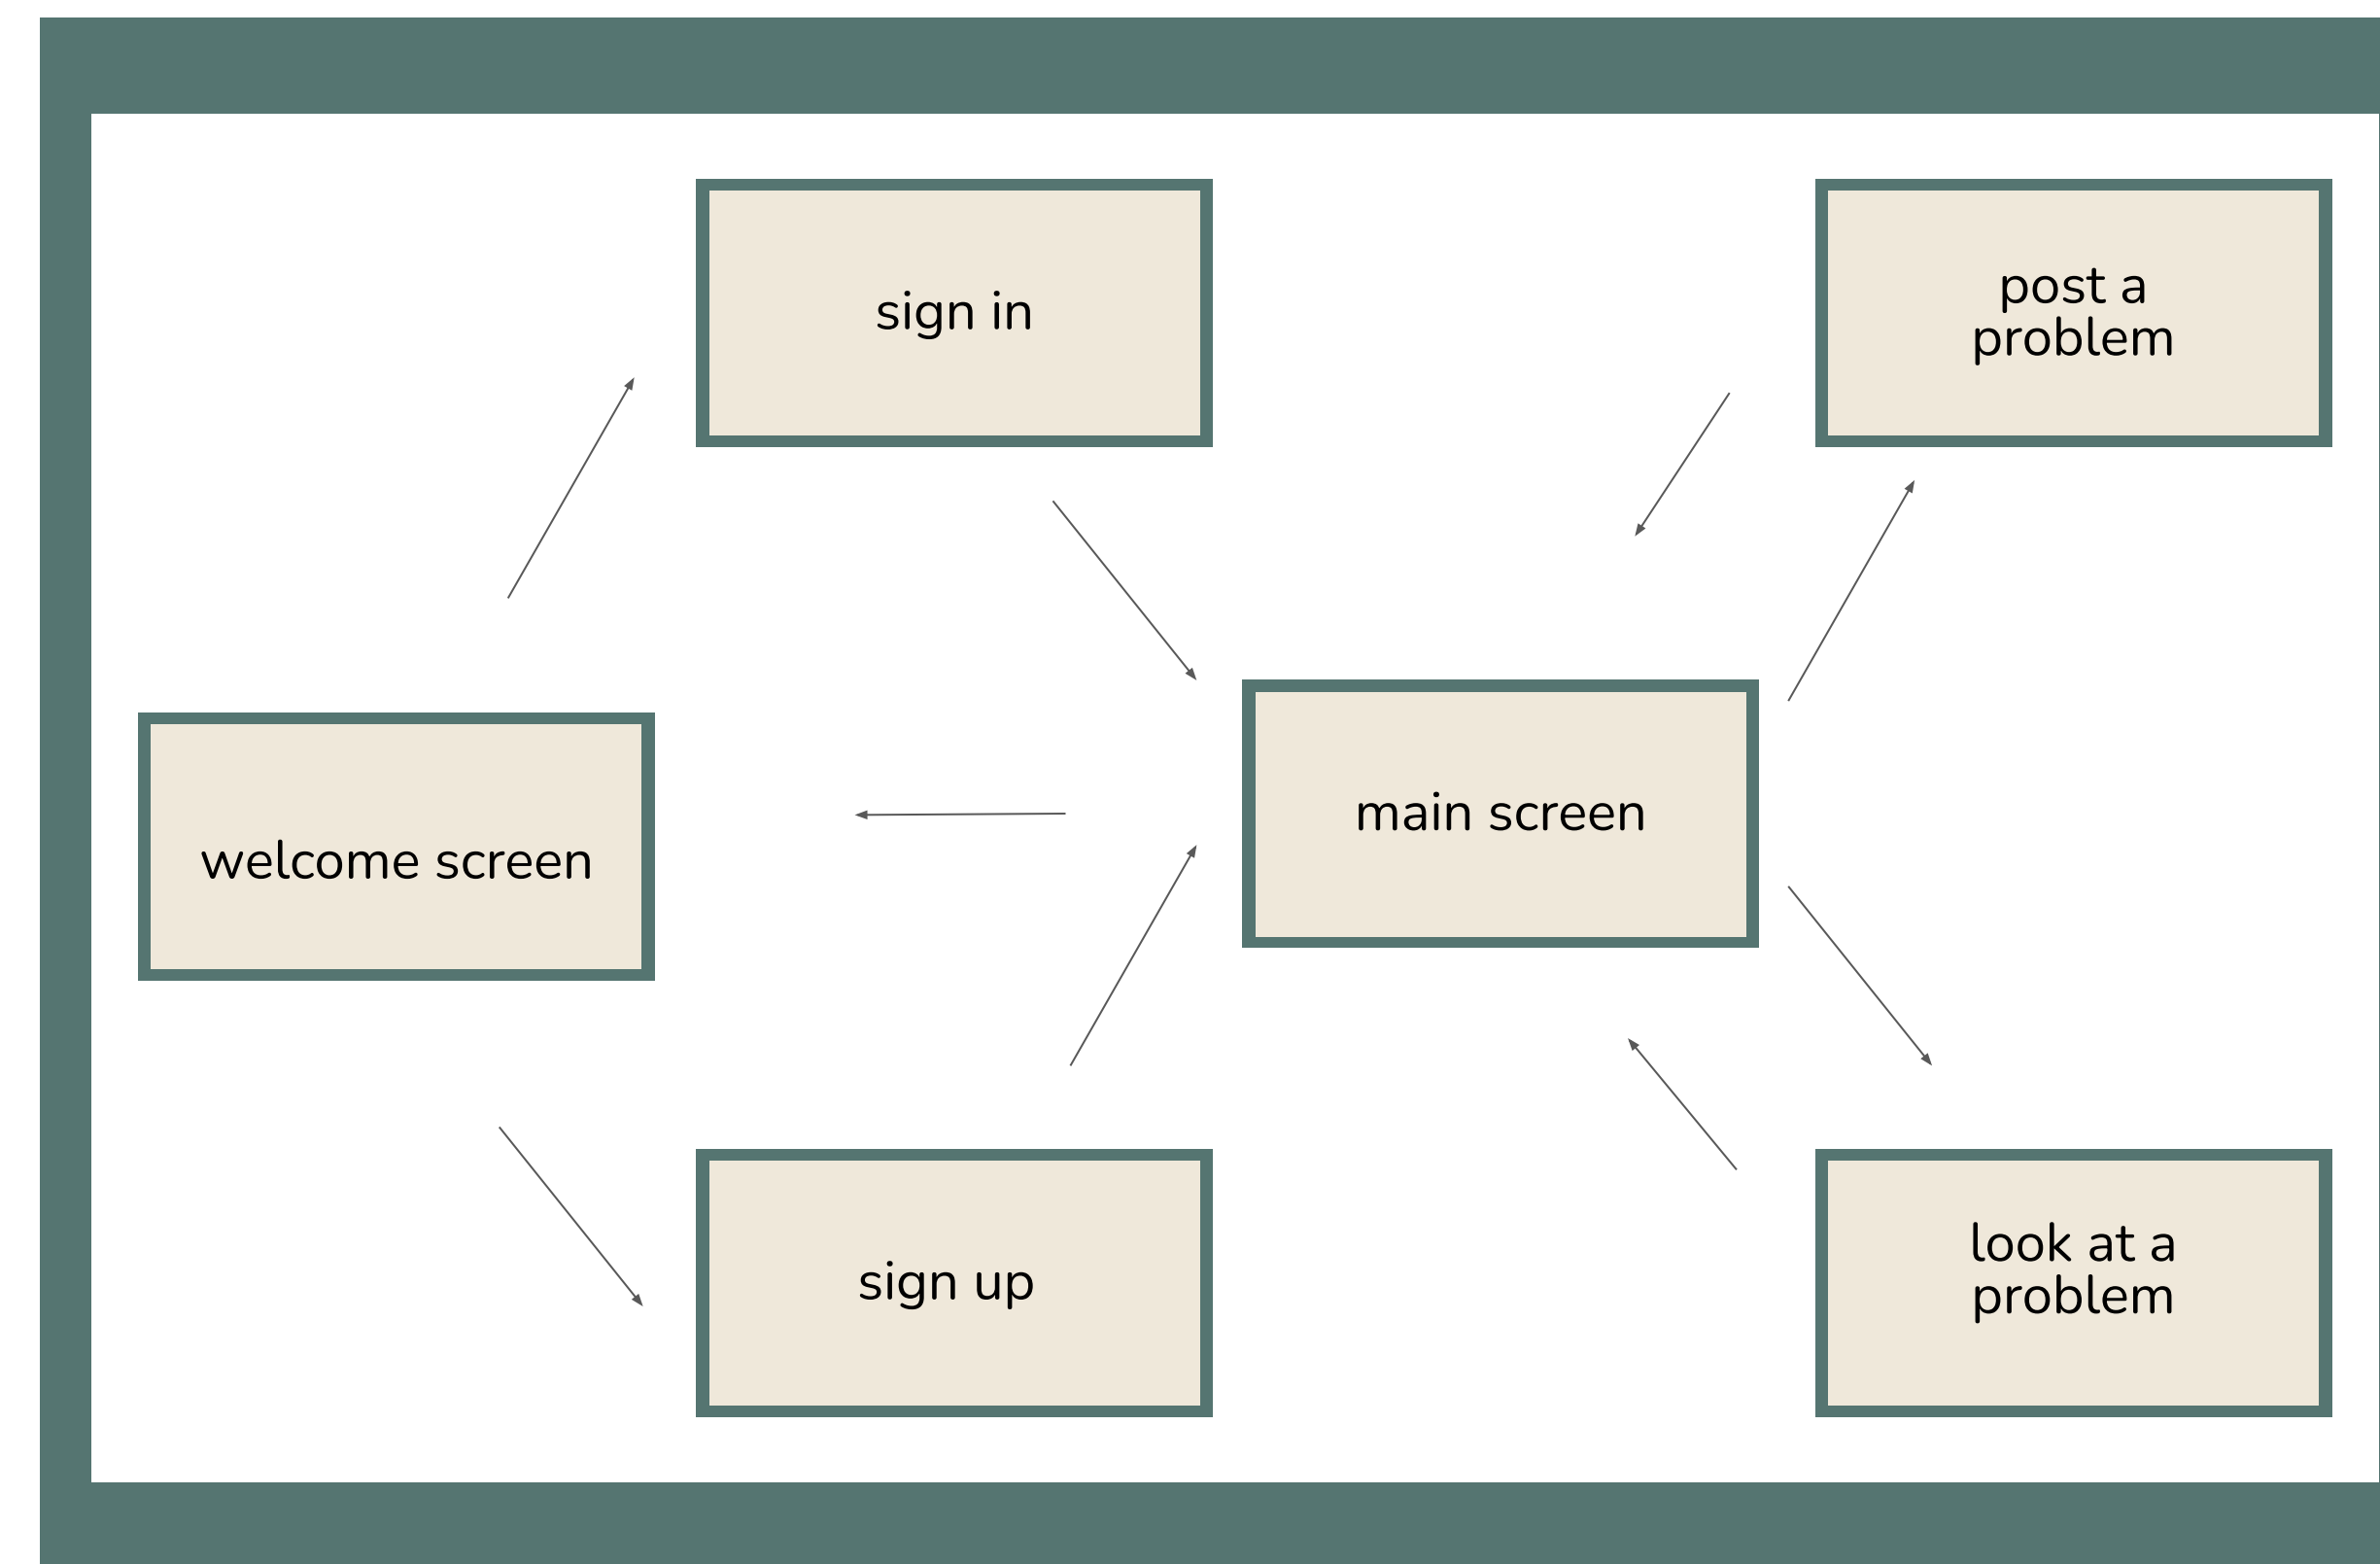

Comp 1: InfoAid

Comp 2: GiveGab

Comp 3: Make a Stand

	InfoAid	GiveGab	Make a Stand
Pros	- Multiple languages - Active alerts	- Interactive	- Interactive
Cons	- Narrow area-of-assistance - No interaction	- Narrow area-of-assistance - Doesn't provide immediate assistance	- Narrow area-of-assistance - Doesn't provide immediate assistance

Tools and Technology:

- Firebase
- authentication,
- realtime database

Services:

- Touchscreen

Future Extensions:

- Language Preferences
