Assignment 5: Revision

Due Thursday March 5, 11:59pm.

This is a chance for you to resubmit any of your Projects for a second round of grading. The issues you fix can be taken either from my feedback or your own critique– anything is fair game.

In the README.md for this submission, be sure to clearly document a) what you changed in each project you're resubmitting and (more importantly) b) a justification for each change (e.g. why the change addresses the issue). Well justified changes will be awarded more points.

Turning in the project

Submit the following:

- All of the source code and data needed to run the program(s), *one folder per project.*
- A README.md documenting a) the projects you're changing, b) what you've changed, and c) justifications for the changes.

Submissions should be made using myWPI. Either:

1. (Recommended) Add text with a link to your GitHub repo(s) and your README.md summary, or
2. Zip your files and README.md and upload to MyWPI
